We would appreciate having a statement about your philosophy and work as an artist—either general or something specific about the piece(s) selected for this year's May Show to aid us in the preparation of gallery talks and in the release of publicity materials. For more space, use the back of this sheet.

There are two characteristics I notice in things around me that influence my work. One is the surface of objects that show the passing of time such as rough edges, encrusted exteriors, cracks, and imperfections. The other is the arrangement of elements in an unpredictable yet organized fashion. The success of my jewelry depends upon these influences working together along with the body, and the movements of the body, so that the piece can catch the viewer's attention, while at the same time draw them closer.
